

Rotary Carpet Shampoo Cleaning

- **Principles of Rotary Cleaning**

The rotary carpet shampoo cleaning is a restorative maintenance procedure which flushes and removes hidden dirt and soil that is trapped at the base of the carpet fiber, which surface cleaning can no longer reach.

- **Equipment / Items Needed**

- Rotary Carpet Shampoo, 3-n-1 Pre-spray & Defoamer
- Cylindrical Foam Machine or a Rotary Shampoo Machine
- Wet Floor Signs
- Pump up Sprayer
- Wet / Dry Vacuum
- Dry Vacuum

- **Rotary Cleaning Procedure**

1. Position appropriate wet floor signs
2. Remove any furniture and vacuum the entire area to be cleaned
3. Remove spot and stains, using appropriate spotters.
4. Apply the appropriate pre-spray to heavily soiled areas, with pump up sprayer. Allow to sit for approximately 5 minutes before shampooing.
5. In the solution tank, mix your shampoo solution, following the manufacturer directions.
6. Start shampooing in an overlapping pattern. Dispense enough solution to create visible foam. Continue until entire carpet area is cleaned.
7. Wet vacuum immediately to remove soil laden foam and speed drying time. ****Don't forget to use defoamer*****
8. On deep pile carpet set nap with a pile brush or carpet rake.
9. Allow carpet to dry thoroughly.
10. When carpet is completely dry, Dry vacuum entire area.

- **Helpful Hints / Tips**

- Be careful not to over wet carpet
- Using a pump up sprayer apply carpet protector for added protection.
- Use the traditional “block or “S” method of shampooing, for best results.
